

# Bitcoin Pepe Whitepaper

## Introduction

**Bitcoin Pepe** is a decentralized cryptocurrency project that merges Bitcoin layer-2 technology with internet meme culture. Built on the **Stacks blockchain**, Bitcoin Pepe aims to create a community-driven digital asset centered around the iconic “**Pepe the Frog**” meme, painted orange to represent Bitcoin. The project focuses on fostering engagement and participation by allowing holders to be part of a fun and interactive ecosystem that explores the lighter side of the crypto world.

## What Makes Bitcoin Pepe Unique

### First Pepe Coin on Bitcoin Layer 2

Bitcoin Pepe stands out as the **first Pepe-themed coin built on a Bitcoin Layer 2 blockchain**. By integrating meme culture with Bitcoin technology, the project promotes accessibility and creativity within the crypto space. This fusion has resulted in community-led initiatives in music, art, and merchandise, attracting both crypto enthusiasts and newcomers to the Bitcoin ecosystem.

### Community-Driven Creativity

Unlike traditional projects that concentrate solely on technological advancements or financial services, Bitcoin Pepe leverages meme culture to inspire community involvement. The project thrives on the creativity of its members, leading to the development of:

- **Art and NFTs:** Launching the Bitcoin Pepe PFP (Profile Picture) collection on **Gamma.io** in partnership with community members and NFT artists.
- **Music:** Releasing the “Return of BPEPE” music NFT on Gamma.io, created by a community member.

## Project History

### Origins

Bitcoin Pepe was created on **March 27th, 2023**, during the early days of the Stacks network. **Mark Kilaghbian**, host of the [Cryptoconomy podcast](#) (the longest running cryptocurrency podcast featuring guests from projects like Helium, Brave Browser, and Velar over the course of 8 years), developed the token while testing the Stackswap launchpad before an episode with ALEX Lab. Believing that Pepe belonged on Bitcoin, Mark initiated the project as a playful experiment.

For nearly a year, the token went unnoticed until the Stacks community discovered it and encouraged the developer to return and assist the project. This rediscovery led to a resurgence of interest and community growth. Ever since it has remained one of the top 5 Stacks memecoins alongside WELSH, LEO, ROO, and NOT.

## Milestones

- **Exchange Listings:** Successfully listed on top decentralized exchanges:
  - **ALEX Lab** (April 2024)
  - **Velar** (May 2024)
  - **Charisma** (July 2024)
- **Community Initiatives:**
  - **[NFT Collection](#)**: Launched on Gamma.io in collaboration with community artists.
  - **[Music Releases](#)**: Debuted the “Return of BPEPE” music NFT on Gamma.io.
  - Weekly **[Spaces](#)** on X every Thursday at 8am PST since April, 2024
- **Security [Enhancements](#)**: In September 2024, the developer removed all legacy admin privileges from the Stackswap launchpad Pepe contract to enhance security and decentralization.
- **Partnerships:** Partnered with **[3Look](#)** to make generating and sharing memes more accessible to the community. Verified as an STXTools Partner. Partnership with SkullCoin for in-game NFTs.

## Future Plans

While Bitcoin Pepe does not focus on utility, the project aims to continue fostering community engagement through:

- **Ongoing Community Events:** Hosting weekly discussions, art contests, and collaborative projects to strengthen community bonds.
- **Expansion of Creative Projects:** Encouraging members to develop new content such as memes, music, and NFTs that embody the spirit of Bitcoin Pepe.
- **Increased Accessibility:** Exploring additional exchange listings and partnerships to make Bitcoin Pepe more accessible to a broader audience.

## Token Information

- **Blockchain:** Stacks

- **Token Name:** Bitcoin Pepe
- **Symbol:** PEPE
- **Contract Address:**  
SP1Z92MPDQEWZXW36VX71Q25HKF5K2EPCJ304F275.tokensoft-token-v4k68639zxx
- **Decimals:** 3

## Contract Verification

- **Explorer Link:** [Stacks Explorer](#)

## Where to Trade

- **Velar Exchange:** [Trade PEPE on Velar](#)
- **ALEX Lab Exchange:** [Trade PEPE on ALEX Lab](#)
- **Charisma Exchange:** [Trade PEPE on Charisma](#)
- **Bitflow Exchange Aggregator:** [Best rates on Bitflow](#)

## Community Links

- **Twitter:** [@PepeCoinSTX](#)
- **Telegram:** <https://t.me/PepeCoinBTC>
- **Discord:** <https://discord.gg/JcHFdKbK2M>

## Distribution

Due to lack of bonding curve and fair-launch products on the Stacks network at the time of inception, the developer added 60% of total supply to initial DEX liquidity on Stackswap and retained the rest of supply to distribute between giveaways, airdrops, team, listings, and burns. 10% of total supply has now been distributed via airdrops and giveaways, 5.55% has been sent to the Cant-be-evil.stx burn wallet, and the 24.45% remaining (of max supply) in the developer wallet (is allocated between the developer, exchange liquidity reserve, and treasury reserve).

Max Supply: 20,000,000,000

Circulating Supply: 18,890,000,000

Burned: 1,111,000,000

- 60% Initial DEX LP
- 10% Exchange liquidity reserve
- 10% Developer
- 10% Giveaways and Airdrops
- 4.45% Treasury reserve
- 5.55% Burn Wallet

## Conclusion

Bitcoin Pepe is a celebration of meme culture within the Bitcoin ecosystem. By combining the iconic Pepe the Frog meme with Bitcoin's layer-2 technology, the project offers a fun and creative space for community members to engage, collaborate, and enjoy the lighter side of cryptocurrency.

**Disclaimer:** Bitcoin Pepe is a community-driven meme project with no inherent utility or financial promises. Participation is intended for entertainment purposes, and individuals should exercise caution and conduct their own research before engaging with the project.
